AGEIMMUNE®

THE COMPLETE SUPPLEMENT GUIDE

Doctor-Formulated • Education-First • No-Compromise Quality
by AgeImmune® - Dr. Aleksander Kanevsky, DC, CFMP

AgeImmune.com

About AgelImmune®

AgelImmune was founded on a single conviction: the supplement industry has a quality problem, and people paying for health deserve better.

Dr. Aleksander Kanevsky, DC, CFMP, is a functional medicine practitioner based in New York City with over two decades of clinical experience helping patients who had already tried everything. The vitamins. The protocols. The popular brands. Yet they still felt stuck.

The problem was rarely the patient. It was what they were putting in their body. Poor bioavailability, unnecessary fillers, magnesium stearate, silicon dioxide, underdosed ingredients, proprietary blends with no transparency. The market was full of supplements designed to sell, not to work.

AgelImmune was built as the answer to that problem. Every formula starts in the clinic. Every ingredient is chosen for a specific reason. Every product is manufactured in small batches in an FDA-registered, GMP-certified facility in the USA, with no shortcuts and no compromise.

Our Philosophy

We treat supplements as tools, not shortcuts, not miracles, not marketing. The best results happen when supplementation is part of a system:

- Foundations first - nutrition, hydration, sleep, and core nutrients
- Targeted support second - 1 to 3 goal-specific additions
- Performance layers last - advanced antioxidants and specialty stacks

The most important rule is consistency. A clean, simple routine followed every day outperforms a complicated one abandoned in two weeks.

The AgelImmune Standard

- Doctor-formulated by a practicing functional medicine physician
- Produced in small batches in a USA FDA-registered, GMP-certified facility
- Free from magnesium stearate, silicon dioxide, and unnecessary additives
- Transparent labeling, no vague proprietary blends
- Active, bioavailable forms selected for real absorption
- Non-GMO and rigorously quality tested

"Education creates clarity. Clarity creates consistency. Consistency creates results."

- Dr. Aleksander Kanevsky

CATEGORY 1: IMMUNE SUPPORT

Your immune system is not a light switch you flip on when you feel sick. It is a complex, layered defense network that requires consistent daily inputs to function at its best. The modern lifestyle, chronic stress, processed food, indoor environments, nutrient-depleted soil, and disrupted sleep, quietly chips away at immune resilience year-round.

The smarter approach is to build and maintain your immune foundation daily, with nutrients your body actually uses, in forms it can actually absorb. AgeImmune's immune support line is built around three synergistic products that address immune function from three distinct angles: foundational vitamin and mineral balance, potent antioxidant defense, and amplified vitamin C support.

Brilliant D3+ Complex with K2 and Magnesium

Your foundational immune trio in one clean daily formula.

- **Vitamin D3 (5000 IU)** to support immune function and year-round resilience
- **Vitamin K2 (MK-7)** to support proper calcium direction and vascular balance
- **Magnesium Bisglycinate** for muscle, nerve, and cellular function, the cofactor D3 needs to activate
- Three nutrients in one bottle, replacing the need for separate D3, K2, and magnesium purchases
- Free from magnesium stearate and silicon dioxide, no fillers, just clean, purposeful ingredients

👉 <https://ageimmune.com/product/brilliant-d3-complex-with-k2-and-magnesium/>

Brilliant C Plus

Not your average vitamin C, a complete immune amplifier.

- **Vitamin C** with **Zinc**, **L-Lysine**, and **Bioflavonoids** for broad-spectrum immune reinforcement
- Bioflavonoids enhance Vitamin C absorption and extend its antioxidant action
- Zinc supports normal immune response and healthy skin integrity
- L-Lysine provides additional structural and immune support
- Designed for split dosing (AM + mid-afternoon) for steady all-day support

👉 <https://ageimmune.com/product/brilliant-c-plus/>

SOD + Antioxidants Complex

Advanced oxidative defense, for those who want the performance layer.

- **Superoxide Dismutase (SOD)**, one of the body's most powerful endogenous antioxidant enzymes
- Targets free radical accumulation that accelerates cellular aging and immune strain
- Supports oxidative balance and healthy inflammatory response
- Works best as a performance layer once foundational supplements are consistent
- Ideal for active adults, those under high stress, or anyone focused on long-term longevity

CATEGORY 2: CARDIOVASCULAR & METABOLIC SUPPORT

Cardiovascular and metabolic health are two of the most overlooked areas in everyday supplementation, yet they affect everything: energy levels, weight, brain clarity, sleep, and long-term longevity.

Most people only start thinking about heart and metabolic health after a warning sign arrives. The reality is that vascular function, blood flow efficiency, and metabolic balance degrade slowly and silently for years before symptoms appear. The two biggest hidden factors? Fibrin accumulation in blood vessels, which traps cholesterol and restricts circulation, and blood glucose dysregulation, which drives energy crashes, metabolic stress, and systemic inflammation.

AgeImmune's cardiovascular and metabolic support products address both of these mechanisms: one focused on circulation and vascular clearing, the other on glucose balance and metabolic health, both backed by credible research.

Brilliant Berberine 1000 Plus

The metabolic supplement doctors have used for decades, finally in a clean, high-dose formula.

- **1000mg of high-potency Berberine HCl** per serving, clinically studied for metabolic support
- Supports healthy blood glucose levels and insulin sensitivity
- Supports healthy lipid balance and cardiovascular function
- Includes Inulin (prebiotic fiber) to support gut health alongside metabolic balance
- Best taken with meals (lunch and dinner) for steady metabolic support throughout the day
- Available in both 60-capsule and 120-capsule sizes

👉 <https://ageimmune.com/product/brilliant-berberine-1000-plus/>

Nattokinase 4000 FU (200mg)

Support your circulation where most supplements never look.

- **4000 FU** of pharmaceutical-grade **Nattokinase**, sourced from Japan for quality assurance
- Supports fibrin breakdown, the sticky protein that accumulates in blood vessels and traps cholesterol
- Promotes healthy blood flow, circulation, and oxygen delivery to the heart and brain
- Supports vascular flexibility and healthy cardiovascular function
- Researched for spike protein support and post-viral cardiovascular recovery
- Ideal for adults over 40, those with circulation concerns, or anyone proactively supporting vascular health

CATEGORY 3: CLEANSE & DETOX

Detox is one of the most misunderstood words in health. It is not a juice cleanse or a crash protocol. True cellular detoxification is an ongoing, daily biological process, your liver, kidneys, lymphatic system, and gut working together to clear metabolic waste, environmental toxins, and microbial byproducts from the body.

The problem is that modern life creates a burden these systems were never designed to handle alone: processed food, chemical exposure, filtered water stripped of natural minerals, chronic stress, and a gut microbiome that has been disrupted by antibiotics, sugar, and poor diet.

Supporting your body's natural cleansing pathways is not about extremes. It is about giving your system the inputs it needs, minerals for cellular transport, and botanicals that support a balanced gut and intestinal environment. AgeImmune's cleanse and detox products do exactly that.

Fulvic Humic Acid with 75+ Ionic Trace Minerals

Nature's oldest mineral delivery system, upgraded for modern wellness.

- Over 75 ionic trace minerals in bioavailable form, essential cofactors missing from modern food and filtered water
- **Fulvic Acid** enhances cellular nutrient uptake and supports natural detox pathways
- **Humic Acid** binds to heavy metals and environmental toxins, supporting the body's natural elimination
- Supports gut lining integrity and mineral transport across cell membranes
- Liquid form for rapid absorption, unlike tablet trace mineral supplements
- Pairs beautifully with ImmuneG.I. as part of a complete gut and detox protocol

👉 <https://ageimmune.com/product/fulvic-humic-acid/>

ImmuneG.I. - Herbal Gut & Parasite Cleanse

A clinical-grade botanical formula for gut balance and intestinal health.

- **Comprehensive herbal complex** targeting intestinal parasites, biofilm disruption, and microbial balance
- Supports a healthy gut environment and reduces microbial overgrowth that strains immunity
- Botanical ingredients selected for their traditional and researched gastrointestinal support
- Addresses digestive discomfort, bloating, and irregular gut function at the root level
- Designed to be used strategically as a cleanse protocol, not an indefinite daily supplement
- Often used alongside Fulvic Humic Acid and a probiotic for full gut restoration support

CATEGORY 4: COGNITIVE & MENTAL SUPPORT

Mental clarity, mood balance, and stress resilience are not luxuries, they are the foundation of daily performance. Yet this is the category most people try to address with stimulants, caffeine, and quick fixes instead of the underlying neurochemical and mineral inputs the brain actually needs.

Chronic stress depletes serotonin precursors. Anxiety dysregulates the nervous system. Modern mineral deficiency quietly undermines cognitive stability. And the cumulative effect, brain fog, low mood, restless nights, and a sense of being mentally flat, becomes normalized as just "how things are."

AgeImmune's cognitive and mental support products are built on a different premise: give the brain what it needs to regulate itself. Targeted precursors, calming amino acids, and a trace mineral with emerging research on neurological health, all in clean, clinical doses.

5-HTP L-Theanine Anxiety Formula

Calm your nervous system. Restore your baseline. Without sedation.

- **5-HTP (5-Hydroxytryptophan)** a direct precursor to serotonin, supporting mood balance and emotional resilience
- **L-Theanine**, an amino acid from green tea that promotes calm, focused mental states without sedation
- Together, this combination supports anxiety relief, stress management, and mood stability
- Supports healthy sleep quality by promoting relaxed neurological tone before bed
- Non-habit-forming, natural approach to nervous system balance
- Designed for adults experiencing daily stress, low mood, or difficulty winding down

👉 <https://ageimmune.com/product/anxiety-formula/>

Lithium Orotate 10mg

A trace mineral your brain may not be getting, and research is starting to notice.

- Low-dose **Nutritional Lithium** (10mg elemental), distinct from high-dose pharmaceutical lithium
- Discussed in Harvard Medical School research in the context of brain aging and cognitive health
- Observational data suggests populations with higher trace lithium exposure show different patterns in brain aging
- Supports neurological balance, mood stability, and neuroprotective pathways at trace mineral levels
- Supports mental clarity, focus, and daily cognitive resilience as part of a brain health routine
- Pairs well with the 5-HTP L-Theanine formula and Brilliant B Plus for a comprehensive cognitive support stack

CATEGORY 5: NEUROLOGICAL SUPPORT

B vitamins are among the most widely discussed nutrients in health, and among the most widely misunderstood in supplementation. Most B-complex products on the market use cheap, inactive forms that the body cannot efficiently convert or utilize. The result is a product that checks a label box but delivers minimal real-world neurological benefit.

The nervous system depends on B vitamins for nearly every core function: energy metabolism, neurotransmitter synthesis, myelin sheath integrity, cognitive processing, and stress regulation. When these inputs are missing or poorly absorbed, the effects are felt as fatigue, brain fog, mood instability, nerve sensitivity, and poor sleep quality.

AgeImmune's Brilliant B Plus was built from the ground up to solve the form problem, delivering active, bioavailable B vitamins with complementary cofactors, in doses that make a clinical difference.

Brilliant B Plus

Active-form B vitamins with Magnesium and D3, the neurological support stack your brain has been waiting for.

- **Active B6 (P-5-P)** - the coenzyme form of B6, directly usable by the nervous system without conversion
- **Methylfolate (5-MTHF)** - the active form of folate, critical for methylation, neurotransmitter balance, and those with MTHFR genetic variants
- **Methylcobalamin B12** - the bioavailable, neurologically active form of B12 (not cyanocobalamin)
- **Magnesium and Vitamin D3** included for synergistic neurological and energy support
- Supports cognitive function, mental energy, mood, and stress resilience
- Supports healthy nerve function, myelin integrity, and the methylation cycle
- Best taken in the morning or early afternoon - active B vitamins can increase alertness

Always consult a qualified healthcare professional before starting any new supplement, especially if you are pregnant, nursing, managing a medical condition, or taking prescription medications.

How to Build Your Stack

The AgeImmune approach is built on three layers. Start with foundations. Add targeted support. Build up from there.

STEP 1	Foundations - Start with Brilliant D3+ Complex, Brilliant C Plus, and Brilliant B Plus for your daily core.
STEP 2	Targeted Support - Choose 1–2 goal-specific products based on your primary health concern (cardiovascular, gut, cognitive, or stress).
STEP 3	Performance Layers - Add SOD+ Antioxidants, Fulvic Humic Acid, or Lithium Orotate once your core routine is consistent.

One rule above all: Consistency beats perfection. The smallest routine you can sustain daily will outperform the most sophisticated one you abandon.
